

My Big Fat Greek Flight Tour

Welcome to the AFV Greek Odyssey. Starting and finishing in Athens; the tour will take you around many of the Greek Islands, Towns and Cities, with some challenging approaches coupled with some beautiful scenery.

The tour is set up using an Olympic Airways A319, but the final choice of Aircraft is up to you, as long as it can make the journey in real life and runway lengths are sufficient. Flight lengths are between approximately 100 and 300 miles.

Flights can be flown online or offline but must use ACARS and match the flight number for all legs.

Details of the current and historic Olympic Fleet https://en.wikipedia.org/wiki/Olympic_Air

There are freeware sceneries for FS2004/FSX/P3D here <https://www.freewarescenery.com/fsx/greece.html>

And for MSFS2020 here <https://flightsim.to/>

I hope you find the tour interesting and enjoyable.
